Name Program

OBJECTIVE: Create a new programming project that does the following:

Output the message, "My name is <insert your name here>" to the screen.

Output the message, "My birthday is <insert your birthday here>".

Example:

```
Console ×   Markers
<terminated> Program2 [Java Application]
My name is Brian
My birthday is September 5
```

GRADING: (10 points total)

Points	Objective
1	Program is able to execute without any errors.
5	The message, "My name is <insert your name here>" is outputted to the screen.
10	Both output messages are printed successfully – similar to the example shown above.
